1.Applicant's election without traverse of Group II, claim 2 in the reply filed on December 4, 2006 is acknowledged.

2.Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 4, 2006.

3.The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Rubens (3,616,172). Rubens discloses the claimed method for manufacturing a structure member made by disposing a solidified granular bulk material obtained by bonding together and thereby solidifying multiple granules inside a skeleton member of a transport machine, the method including the steps of placing granules, which are made by wrapping, coating or layering a core substance with a film or coating, into the skeleton member or space in an un-expanded state, and heating the granules and thereby causing the granules to expand. Note column 4, lines 38-73.
